

Coil Tubing Products

Product Benefits

- Liquid xanthan viscosifier
- 4.1lbs xanthan per gallon
- Rapid hydration

Principal Uses

OF-3060 is a liquid natural polymer that functions as a viscosifier in freshwater or brines in completions operations.

Feeding and Dosage

OF-3060 dosages vary depending on temperature and water characteristics. Typical dosages in gel applications range from 2-10 gallons per thousand. Actual dosages should be determined prior to the application in order to achieve desired optimum fluid characteristics.

OF-3060

XANTHAN POLYMER GEL

Physical Properties

Appearance and Odor	Cream colored slurry
Charge	Anionic
Density	9.17 ±0.1 lbs/gal
Pour Point	< -20 °F
Flash Point (PMCC)	>200 °F

Compatibility

OF-3060 is compatible with all anionic and nonionic surfactants and other additives that may be present in typical completions fluids.

Handling and Storage

OF-3060 should be stored between 40 and 90 ° F and protected from freezing. The shelf life of OF-3060 is six-nine months stored appropriately in unopened containers.

Read the label and Material Safety Data Sheet for complete handling information before using or storing this product.
